

Outreach Committee Meeting

August 2026

Anti Trust Police Notice

Linux Foundation Europe meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

Examples of types of actions that are prohibited at Linux Foundation Europe meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at <http://www.linuxfoundation.eu/antitrust-policy>. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.

Next steps:

- Strategy for upcoming Community Calls

News from KPI SIG

(Abu, Tristan)

Why the SIG?

NeoNephos has no clear answer to whether the community is growing, which projects are stalling, or whether anyone outside the founding organisations is adopting the work.

2. Where we are

Active contributors, last quarter	31
Contributor retention, quarter over quarter	93%
New pull requests per month	104
Average PR lifespan	3 days
Active days out of 365	254
Contributions outside working hours	22%
Average issue resolution	80+ days
GitHub stars / forks	8 / 13

3. Two risks in that data

Concentration. 2 contributors account for 51%+ of contributions. So do 2 organizations.

Reach. 8 stars and 13 forks, against 104 pull requests a month. No inbound pipeline. Contributors and adopters arrive through people who already know the project, which holds contribution inside the same two organizations.

4. What we will report

- Available now, from LFX Insights:
 - Active contributors
 - Contributing organizations
 - Pull requests merged
- Added once the source is connected:
 - Git commits
 - New adopters
 - Zulip growth
 - Social media growth
 - Event attendance

Level	Cadence	Audience
Executive	Monthly	Steering Committee
Operational	Weekly	Maintainers, SIG leads
Strategic	Quarterly	Governing Board, partners

5. How we get there

Phase 1. Establish the SIG, assign KPI ownership, select tools, set the baseline.

Phase 2. Build the automated dashboard covering GitHub, Zulip and social.

Phase 3. Monthly reporting, quarterly health reviews, and recommendations that change what we do.

We are modelling this on LFX Insights.

6. What we need

1. Zulip channel for the SIG
2. Owners for Zulip, newsletter and website analytics access.
3. Outreach investment against the reach numbers on slide 3.

Further topics

- The TAC Chair would like to have an Outreach Committee Rep. join their monthly sessions. This Outreach Committee Rep. can be any person associated with the Outreach Committee through membership or SIG. It is not tied to a specific person but ANYONE fulfilling aforementioned criteria. The sole expectation would be that the Outreach Rep. briefly talks about what's happened in the Outreach Committee and takes notes about what TAC members need from the Outreach Committee.
→ Oliver Thylmann can take over on August 28
